

Environmental Policy Statement

Lindapter International specialises in the design, procurement, manufacture and supply of technical steelwork fixings and associated components. Compliance with all legal, environmental and other requirements, respect for the environment, protecting the environment from pollution or damage and striving for the highest standards in all our operations is an integral part of the organisation's business strategy.

The Managing Partner is responsible for ensuring that the requirements of the environmental policies are complied with and has nominated the Operations Director and the EHS Manager to install and maintain appropriate procedures and systems. The EHS Manager will also submit a report of any incidents and progress made towards specific objectives and targets to the Managing Partner and Operations Director.

As part of our Environmental Management System, we aim for continuous improvement in:

- The prevention of pollution and damage to the Environment
- The minimisation or elimination of waste from all areas of the business.
- The efficient use of energy, investigating means to reduce energy usage wherever possible.
- The use of packaging materials and stationery which have been or can be recycled.
- Designing products to minimise their environmental impact throughout their life cycle.
- Risk reduction to our employees, the eco-system and the community at large.
- The purchasing of environmentally balanced products and services where feasible.
- Company and Employee culture through adequate information, instruction and training in matters relating to Environmental sustainability practice.

All employees, at all levels in the Organisation have responsibilities for the implementation of the Policy and must ensure that environmental issues are given adequate consideration in the planning and day-to-day fulfilment of all work. They are encouraged to play a full part in the implementation of our environmental policy through continuous improvement of both individual and collective behaviour through the annual Goals & Objectives programme.

We involve our suppliers, customers, regulatory authorities and the community in improving our environmental performance where appropriate and possible.

This policy, specific objectives and targets, are reviewed regularly by the Managing Partner.

Gordon Browning
