

Lindapter ENVIRONMENTAL PERFORMANCE

THE KEY FACTS

Reduced emissions by **153kgs CO₂ / tonne** of product manufactured in 2015 compared to 2012.

Reduced site electricity consumption by **19.7%** in the period of 2012 to 2015, compared with 2008 to 2011.

Achieved a **27% carbon footprint reduction** in FY 2015 compared to FY 2012.

Current reuse and recycle rate of **97.1%**.

Business Operations saved **144kgs CO₂ / tonne** of product manufactured in 2015 (57% less than 2012).

100% zero waste to landfill, an objective achieved one year ahead of target.

Consumed **15.9% less natural gas** in the period of 2012 to 2015, compared with 2008 to 2011.

We are committed to **continual improvement** in all areas of operations.

Our CO₂ footprint comprises of emissions arising from site electrical and gas consumption, as well as fleet business travel emissions.

The reduction in gas consumption has been achieved using an effective company heating management system.

Energy saving initiatives such as installing energy efficient lighting in the factory and an ongoing office LED lighting project have contributed greatly to reducing our electricity consumption.
